Where Biotechnology Meets Aesthetic Perfection

PRODUCTS CATALOGUE

BIOTECHNOLOGY AESTHETICS

Bioesthe stands for "Aesthetic Biotechnology". This cosmetic line is founded upon the distinctive properties of cutting-edge biotechnological active ingredients, including plant growth factor, peptides, grape fruit stem cells, ceramides and hyaluronic acid. These ingredients work in harmony with the enriching qualities of natural active ingredients, such as natural vegetable oils and vitamins.

Through their synergistic application, these formulations aim to rejuvenate physiological cell activity, restoring the skin's innate radiance and suppleness. Meticulously crafted, these products have been designed to effectively address the specific concerns of consumers troubled by skin imperfections.

BIOESTHE Products List Lines:

- *Restructa* - dry and devitalized skin
 - *Sensirose* - sensitive skin
- *Purity* - oily and combination skin
 - *White Spot* - against dark spots
 - *Body Line* - slimming treatment

RESTRUCTA

For Dry and Devitalized Skin

Moisturizing - Revitalizing - Restoring - Antiaging

*Plant Epidermal Growth Factor - Peptides - Hyaluronic Acid - Ceramides
Grape Fruit's Stem Cells - Natural Extracts*

RESTRUCTA is a cosmetic line specifically designed for mature skin. It combines natural extracts with biotechnological active ingredients such as Plant EGF, Grape Stem Cells, Peptides, Oligopeptides, Snail Serum, Vitamins and Hyaluronic Acid, some of the most advanced principles in the cosmetic industry. Thanks to its innovative formulation, Restructa effectively reduces the signs of aging, restoring youthfulness and radiance to the skin. Its products feature soft, silky textures and delicate, sensory fragrances, offering a truly luxurious beauty experience.

At the heart of this line is the exclusive EGF sub-line, a breakthrough in cosmetic science that harnesses the power of Growth Factors to effectively reduce wrinkles and combat skin aging. The EGF Line represents the cutting edge of cosmetic innovation, utilizing Plant Growth Factor with the same physiological properties as epidermal growth factor to trigger a cascade of intracellular rejuvenation processes.

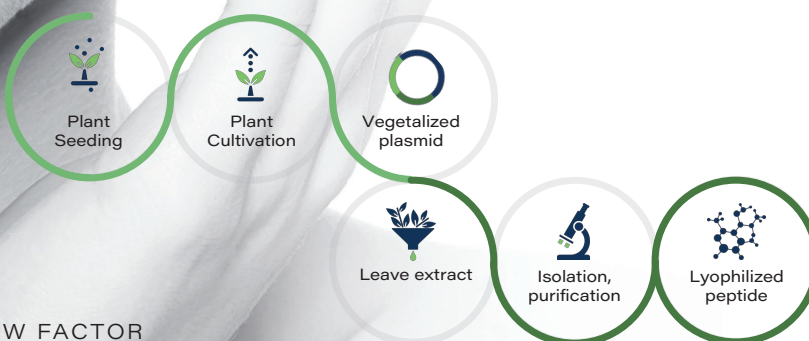

SCIENCE AT THE SERVICE OF BEAUTY

WILD PLANTS AS BIOFACTORIES TO PRODUCE GREEN SYNTHETIC PROTEIN

Synthetic **human gene** cloned into an expression vector, transcribed in vitro into mRNA and **inserted through** the leaves into the **cytoplasm** of vegetal cells while **nuclei remains untouched** (natural plant expression system). The result is **Plant EGF**.

NON-GMO

GREEN TECHNOLOGY: The New Process to Produce the EGF through Plant

GENTLE CLEANSER

Emollient Cleanser

Tender cleansing milk based on vegetable Marigold, Sweet Almond Oil and Aloe Vera and Mauve extract, tenderly cleans the skin, hydrating deeply, and making skin soft and firm. Suitable for mature skin's types and recommended, when visible marks of ageing and reddening occur.

WHITE SPOT

FADE DARK SPOT - BRIGHTENING - LIGHTENING

DEPIGMENTING

LIGHTENING

MATTIFYING

WHITE SPOT

Against Dark Spot

Protecting - Lightening - Brightening - Depigmenting

Hydroxyapatite - Glutathione - Cysteine - Glicolic Acid - Extract of Licorice - α Arbutine - Eureco HC (PAP) - Phytic Acid

Skin spots can be caused by various factors, such as prolonged exposure to UV radiation, hormonal imbalances or post-acneal scarring. The consequence of these discolourations is excessive melanin production, which manifests itself in the form of dark spots or irregularities in skin tone.

The products in the **White Spot Line** contain the latest generation of active ingredients, in particular one awarded as most innovative whitening/brightening active ingredients. The synergic action of these products increases the production of Pheomelanin by reducing Eumelanin (dark melanin) production through the inhibition of tyrosinase synthesis. In addition, it has a strong mattifying effect that leaves the skin without sebum and oiliness.

Packaging:
tube 80 ml

PROTECTIVE CREAM

UV-Protection Cream

Not greasy cream containing sunscreens that protect skin against damages caused by photo ageing. It contains Zinc Oxide, set to protect the irritate skin after the laser treatment. It soothes the skin after reddening and normalizes the sebaceous secretion that facilitates hair growth.

MAIN ACTIVE INGREDIENTS:

Sun Filter, Coconut Oil, Aloe Vera Gel, Vitamin E

USE:

Apply the product on the face and massage it until completely absorbed.

ENVIRONMENTAL DISPOSAL:
